In the SOS Alarm menu, select whether you want the phone to sound an alarm when this function is activated.
If the SOS function is switched on, a longer hold on the "SOS" button will activate the SOS function, which will proceed as follows:

A loud alarm will sound and an SMS will be sent to all emergency numbers with the following content: "Please help.".

The set emergency numbers will then start dialling, each number will be dialled three times.

The SOS call stops if any person answers the call or if no person answers the call

after the third dial.
Important Notice: The phone is equipped with the function of sending the approximate location of the phone via SOS message after triggering an SOS alarm. The phone uses the GSM mobile network to determine its location. The accuracy of positioning depends on the density of GSM network coverage - in cities the accuracy is tens to hundreds of metres, outside cities the accuracy is significantly lower.
There is no guarantee for this service and the accuracy of the results or availability of the service is in no way guaranteed
phone supplier, operator or
map provider. The provision of the service may be without
the notification is terminated at any time.
